

Call For Biden's Impeachment

by

Phil Rasmussen

In the previous commentary, we discussed Biden's criminal behavior. Today he progressed from just being a criminal to a mass murderer.

He has on his hands the blood of thousands of Afghans who supported the US during the Afghanistan War. When advised by our security and intelligence agencies, that these people were in harm's way with the takeover of the country by the Taliban, he did nothing!

Biden did nothing to ensure the safety of the people helping us. He did nothing to ensure the safety and well being of women and girls in this male dominate country. He did nothing to bring peace or democracy to the Afghan people and their country.

His shameless callousness and lack of remorse clearly demonstrates what a sociopathic narcissist Biden is.

The "Fall of Kabul" is the latest audaciousness of this sadistic and perverted president. We have experienced his perversion of his years in Congress, and not even into his presidency a year, we have seen it with regard to securing our borders and his handling of the Covid pandemic.

Biden's only desire is to bring our nation and Americans to their knees. Can our nation stand another three years of this demonic person?

As facts continue unraveling over Biden's Afghanistan actions, Kamela Harris and Democrats in the House are looking at the possibility of implementing the articles in the 25th Amendment of our Constitution. At this juncture, there is no doubt that the Democrats are seriously considering the removal of Biden from office.

While this has been a Republican and conservative desire, using the 25th Amendment is not appropriate. While we know that Biden is "crazy as a loon," and makes a lot of gaffs, we must consider that he does not "walk the talk." He broke his promise to the Afghans who helped us. He ignored the advice of military and intelligence leaders. And now he has blood on his hands without any true remorse.

In his eight months as president he has been caught in lie after lie, he has not made any attempt to secure our borders, he has facilitated obstruction over the criminal activities

of his family, and he has created mass confusion over the Covid pandemic. These are not acts of dementia but rather of treason, arrogance, malfeasance, and criminal activity.

It is easy to understand that the Democrats would prefer for their “golden boy” to leave office under a disguised veil of sickness rather than to have the criminal record of impeachment. Under the 25th the Democrats will still be able to hold onto Biden’s “legacy,” however false and disreputable it is.

It is time for Republicans and conservatives to start calling for impeachment, and for the House to start impeachment proceedings.

Contact your state and federal representatives and demand impeachment.
